

**ACUT SERVICES:**

- Concrete Polishing
- Concrete Cutting
- Concrete Grinding
- Core Hole Drilling

**CONCRETE POLISHING.**

Concrete polishing is not a coating but a method for mechanically grinding, treating and polishing old or new concrete floors. Concrete is already one of the most durable surfaces known to man, however by treating and then polishing it, the surface abrasion resistance and wearing properties are increased.

**CONTACT DETAILS:**

M: 0411 178 132  
 E: [mail@acut.net.au](mailto:mail@acut.net.au)  
 W: [www.acut.net.au](http://www.acut.net.au)

Concrete Polishing substantially reduces the need for epoxy or thin film coating, providing a surface that can withstand even the toughest traffic. Over the time of the floor, the end result is incredible longevity, performance, shine and beauty, low maintenance and very cost-effective flooring alternative.

**FLOORING COMPARISON CHART.**

<b>BENEFITS</b>	<b>CONCRETE POLISHING</b>	<b>FILM COATING</b>	<b>EPOXY</b>
HIGH GLOSS LEVEL	✓	✓	x
HIGH ABRASION LEVEL	✓	x	x
